All about us...

In 2005 Cathy and I were enjoying a romantic weekend in New York and were drawn into the luxury world of Takashimaya, a Japanese department store on Fifth Avenue. We purchased two small and inexpensive items and the sales assistant asked us if we would like them gift wrapped...After what seemed like an age, she returned with a wonderful creation... our small and meager purchase, had been transformed through the power of beautiful paper and ribbon, into a gift that looked a million dollars!

So why did this matter..? Fast forward a few days and the gift was handed over and for a brief moment, life slowed down and distilled to one of the most important feelings that we are lucky enough to experience... the recipient felt loved.

It was this moment that motivated us to create a business that would help to facilitate these special moments and so Vivid Wrap was born!

With a passion for color and love of design, we create all our products in our design studio, in Bath, England. Inspired by the world of fashion and interiors, our aim is to create a luxury handmade product that gives you the retail buyer a real point of difference!

THE PERFECT WAY TO INFORM AND INSPIRE YOUR STORE TEAM...

www.lovevivid.blog/about

It's not just paper...

Our Recycled Cotton papers are handmade using the off cuts of cotton from the textile trade. It takes two skilled workers a day to make 500 sheets of cotton paper. Water based dyes matched to any Pantone shade, enable us to achieve our Vivid base paper colors. Once made, we hang each sheet out in warm sunshine to dry! Our Kraft Paper is made from recycled waste paper... and we also print on a variety of recycled mill papers.

www.giftwrapcompany.com

We hand make our full collection in our wonderful Indian factory. We are proud to have built a sustainable business that now supports over 1,000 skilled team members and their families...

We aim to create a luxury handmade product that gives you a real point of difference.

...it's a mini work of art!

Mixing water based inks by hand, we screen print all our surface designs, to create our Vivid color! We hand crush our foils and hand apply our glitters, each finish a separate process, lovingly delivered by our dedicated India team.

We filter, treat and re-use all water within the factory harvesting rain water for future use.

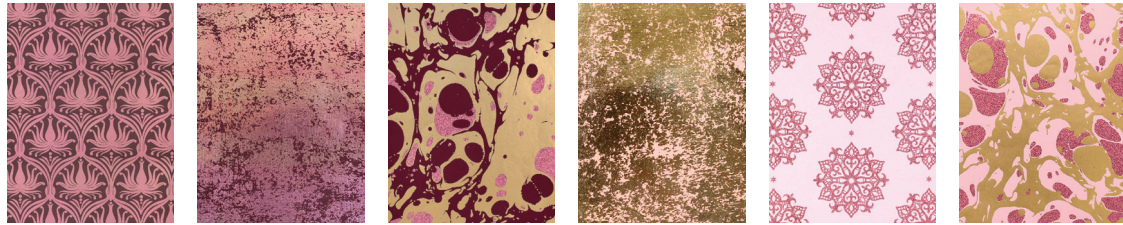

Our screen printing process creates a real point of difference for gift packaging and paper goods, as we are able to use more vibrant colors, richer metallic inks, foils and colorful glitters. Our inks sit on top on the paper, rather than bleed into the paper... this means our color Pops!

COLORSTALK... HOW DO THEY SPEAK TO US?

London Red

It takes us a whole day to hand make 500 sheets of recycled cotton paper. Water based dyes are mixed by hand to create our Vivid colours and we hang each sheet out in the warm sun to dry. We crush our foils by hand and delicately apply them to the cotton paper, each sheet is a mini work of art.
