# Filled Product Color Sequencing

Start with the first color that you carry from left to right until you fill one shelf. Your next color should go directly below the last color on the first shelf. Fill the second shelf from right to left. Again, start the third shelf directly below the last placed color on the second shelf and fill left to right. Repeat until the cabinet is filled.

# Pillar & Dinner Product Color Sequencing

Slightly different from the Root Filled product to give the greatest impact for a line that is driven by color. Apply the same process, left to right on the first shelf and then begin the shelf directly below on the right and move to the left.
